Annapurna Neurological Hospital
Maitighar Mandala, Kathmandu

Subject: Application for the Position of Junior Software Developer

Dear Hiring Manager,

I am writing to apply for the position of Junior Software Developer at Annapurna Neurological Hospital. I would like to begin by noting that my application comes slightly later than the original deadline, as I only recently learned of this opening. I sincerely apologize for the delay and appreciate your consideration of my application.

I am drawn to this opportunity because it combines my interest in software development with the chance to contribute to an institution dedicated to improving patient care and health outcomes. I am eager to bring my technical skills, willingness to learn, and strong work ethic to a team supporting such meaningful work.

As a full-stack developer with a strong foundation in Python, I have hands-on experience building and maintaining end-to-end production-level restaurant management system, where I worked across both front-end and back-end components to deliver a reliable, real-world application. Alongside this, I have developed several other web applications, which have strengthened my ability to quickly learn new technologies and translate them into functional, well-structured solutions. I am confident that this combination of practical experience and adaptability will allow me to contribute effectively to your development team from day one.

I would welcome the opportunity to discuss how I can contribute to your development team. Thank you for taking the time to review my application, and I hope you will consider it despite the brief delay in submission. I am available at your convenience for an interview and can be reached at 9768994772 or saorjdevkota521@gmail.com.

Thank you for your time and consideration.

Sincerely,
Saroj Devkota
